BIARA

SANTA GERTRUDIS

BIARA SANTA GERTRUDIS

Biara was established in 1976 with the purchase of bulls from Orleans Farms in Esperance. These classified bulls went over an Angus/Hereford/AIS cross herd. Herd grading up was a slow business so cows were purchased from Mt Ty in Queensland, Orleans Farm, Koorabup, Bahloo and Gundamain in WA to hasten the process.

Quality classified bulls have since been purchased from Rosevale, Gyranda, Eidsvold Stn, Yarrawonga, Wave Hill and Kelly Wallah.

Poll cattle have played an important part in our herd with at least 75% of the cows being polled. Future plans will involve these numbers of polled cattle increasing.

Biara's breeding objectives have always been to produce moderate sized cattle with good doing ability, lots of muscle, are fertile and with good early growth figures but are able to grow on as steers. These objectives have enabled our cattle to fit into the export, local and the Jap ox markets and are as important today as the day we started. Our breeding herd is run as a commercial herd with hay the only supplementary feeding during the break of the season. Heifers calve at 2 year old and cows should calve every year. They are allowed to miss one pregnancy during their life if seasons go against them.

Bull calves are weaned onto stubbles then grazed on oats before being finished on grain for 40 days pre sale.

We are well aware that too much feed shortens a bulls working life and we are looking for a balance between presentation and presenting fit, fertile and quiet young bulls for sale.

EBVs have been used extensively in our herd and over the last few years and we have come to trust these figures in selecting replacements along with our strict visual assessment for structural soundness, fertility and doing ability.

The Hasleby family wish to extend an invitation to attend our on farm bull sale on Tuesday **11 April, 2017.**

We very much look forward to seeing you here.

BIARA

SANTA GERTRUDIS

12th Annual Sale

11 April 2017

Sale commences at 2.30pm

The Hasleby family will offer for public auction:

61 Santa Gertrudis bulls (51 polls or scurs)

4 Sangus (Black Santa/ Angus)

Pre-sale inspections welcome any time. For further information ring:

Outside Agents:

A 3% rebate will be paid to any outside Agent who introduces new clients to the stud. New clients must be notified to Landmark 48 hours before the sale. The Agent must accompany and assist their client on the sale day.

NOTES TO BUYERS

Pic No.

Buyers, please present your Pic No at registration on the day.

Delivery instruction sheet

At the back of the catalogue must be filled in prior to Taking delivery of bulls

Sale supplementary sheet

Provided on sale day

Transport

Bulls can be delivered to Coolina if required

Inspection

Bulls will be yarded for inspection by 12.30pm on the day of the sale. Inspection welcomed prior to the sale by appointment.

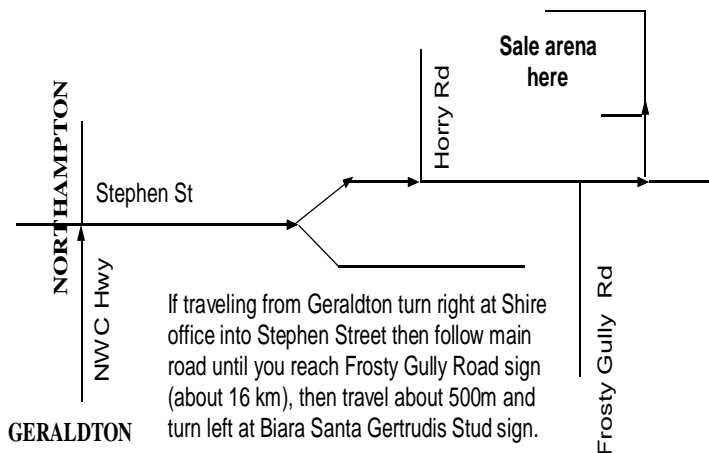

Health

All bulls receive Vibrio, 7 in 1 and Pestigard vaccinations prior to sale and as weaners

Airstrip

Northampton Airstrip is approx 5 kms from Biara farm. Contact John for more details on 9934 1156.

Biara is situated 16km east of Northampton. Map below.

BIARA SANTA GERTRUDIS

*EASY DOING, FERTILE
BULLS THAT PERFORM*

GROUP PLAN EBV'S How to Interpret Them

Notes on Group Breedplan EBVs:

BREEDPLAN is a genetic evaluation system for beef cattle that uses all pedigree and performance information known about an animal and its relatives to calculate Estimate breeding Values (EBVs). EBVs are the best estimate of the genetic merit of an animal for each trait measured. **EBVs are free from environmental influences that play a significant part of the observed performance of an animal.** Units of measurement for EBVs depend on the trait; for example, growth traits are in kilograms and fat depth in millimetres.

The GROUP analysis for Santa Gertrudis BREEDPLAN is processed by ABRI (agricultural Business Research Institute) from the integrated pedigree/performance database of the Santa Gertrudis Breeder's (Australia) Association.

NB: GROUP BREEDPLAN EBVs can be compared with animals in other Santa Gertrudis Herds but not with animals in other breeds. It is important when assessing GROUP EBVS of a particular animal, to compare them with the average of the breed. The average of 2013 drop calves is used as the measurement of the current genetic level of the breed.

CURRENT GROUP BREEDPLAN AVERAGE EBVs 2015 CALVES

200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
+1	+10	+16	+21	+25	+0.8	+2.0	+0.1	-0.2

HOW TO USE EBVs The first step is to decide what characteristics are important in your breeding program, then select EBVs which fit the bill for your herd. For example, if you are selling 14 month old steers and the last draft you sold could have been heavier without prejudicing your market, then you should look for a bull with a high EBV for 400 day weight.

ARE BULLS WITH NEGATIVE EBVs WORTH BUYING?

Yes. They can be. EBVs are a guide to help in selection – not the only selection criteria you should use.

200 DAY MILK AND GROWTH:

The vealer producer should place emphasis on the 200 day growth and milk genes. If the bull is to be used as a terminal sire, growth is most important. If the bull is to be used to breed replacement heifers and superior milking and mothering ability is required then pay close attention to the EBVs for milk (kg). The estimate in kg milk is not the yield of milk of the dam, but the growth of the calf due to more milk and better mothering in the dam.

400 DAY WEIGHT:

400 Day Weight EBVs are a measure of the animal's ability to grow to 400 days of age (can be measured from 301-500 days). It should be used by producers who wish to turn off yearling cattle.

600 DAY WEIGHT:

600 Day Weight EBVs are computed for growth to 600 days of age (can be measured at 501-900 days of age). In production systems for heavy steers, this is important. It is the best prediction of an animal's ability to grow on to maturity.

ACCURACY:

An accuracy on EBVs gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the less the animal's EBV are likely to change as more information is analysed for that animal and its relatives.

SIRES OF SALE BULLS

Rosevale Cobb n Co C364 (P)

Sire: Waco Freeman (P)
Tyndale Noddy (P)
 Bowenfels Danelle 2nd

Dam: Murrumbo Edgar
Rosevale Shelley V129
 Rosevale Shelley V26 (P)

GROUP BREEDPLAN FIGURES

200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
+3	+25	+39	+49	+63	+2.8	+4.4	+0.6	+0.8
61%	88%	87%	84%	77%	83%	63%	71%	71%
\$ index value - Domestic +27					Export +26			

Remarks: Purchased at the Rosevale sale 2008 for \$17000 Cobb N Co is a very dark, extremely well muscled polled bull with large testes. His weight & SS EBV's place him in the top 1% for the breed but still comes in an early maturing thick set package. We feel Cobb N Co can be put over any type of female to produce a thick polled, tropical animal for us.

Greenup Doo Hickey D136 (PS)

Sire: **Gyranda Atom**

Dam: **Greenup A33**

GROUP BREEDPLAN FIGURES

200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat

48%	80%	80%	73%	57%	72%	58%	56%	56%
\$ index value - Domestic +20					Export + 25			

Remarks: Doo Hickey is a very dark sleek coated poll scured bull purchased from the Greenup stud in 09. His thickness and squareness are what impressed us along with a clean sheath, bullet proof temperament and finishing ability. He is an early maturing bull weighing 730 kg at 18 months we are confident he can pack that beef on any animal he produces.

Rosevale Bandanna F216(P)

43%	67%	68%	70%	63%	70%	53%	60%	59%
\$ index value - Domestic +17 Export + 22								

Remarks: Gyranda H 464 (P) was purchased in 2013 and will be an outcross for our herd. He is a poll bull with a very good sheath and tremendously slick coat, large testes and is a very mobile and easy mover. Has been used over heifers this year and next, and we are confident he will be a big contributor to our herd.

FUTURE SIRES

Gyranda Kenny K 592 (P)

Sire: Raytek Democrat (P)
Rosevale Democrat (P)
Rosevale Honey Y165 (P)

Dam: Strathmore Warden(P)
Gyranda F445 (P)
Gyranda Z 303

GROUP BREEDPLAN FIGURES

200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
-1	+19	+23	+30	+34	1.9	+3.8	0	-0.4
43%	62%	60%	60%	63%	50%	45%	47%	47%
\$ index value - Domestic +22 Export + 23								

Remarks: Gyranda Kenny (P) was purchased in 2015 for \$13000 He is the bull we were hoping to find,, moderate frame ,very thick and wide,very good sheath & testes,good slick coat and very quiet As Kenny wont be used here until July 2016 he has been left at Gyranda to mate their A-1 cows until Xmas, an indication of the regard they have of him. He is the bull we feel we can put over any cow we have to get a worthwhile progeny that fits our criteria Can be seen on the front cover.

Wightfields Downpour G21 (P)

We have purchased semen from Downpour so can expect calves May 2016 from our AI program.
Downpour fits into our criteria as he is a soft thick,muscly polled bull with good sheath and quiet temperament.
He sired Rosevale's top price bull at their 2015 annual sale at \$70000. We were impressed with the consistancy he is throwing and are excited to see his progeny which are not letting us down,they are among the heaviest at weaning with a couple showing stud potential

Wilgaroon Dunkurk (P)

Another sire we have used in our AI program.
Dunkurk is sired by Wave Hill Major (P) out of a prolific Murrumbo Cow. He is an extremely quiet, good sheathed poll bull who has lots of muscle very fertile and finishing ability. How could we not use this bull. Progeny are extremely quiet ,

BIARA BLACK SANGUS

Biara has embarked upon a programme to supply the market with a black bull that has some Bos Indicus characteristics. We propose to keep these animals at 50% Santa Gertrudis and 50% Angus. To get to this point we purchased 15 females from Moordalup Stud and use our own stud bulls. The resulting male progeny you can see here today.

Our aim is to breed animals that combine the best qualities of both the Santa and Angus breeds- namely carcase, marbling, market acceptability from the Angus and slick coat, weight gain and structural soundness from the Santa Gertrudis.

If we can get some of these attributes in some of the cattle we will feel that we are on the right track.

Midwest Agribusiness Team

Geraldton Northampton Three Springs

Fax 1300 651 969

These days, farming is becoming a much more complex business and it's hard to find the right people who will visit your farm business to discuss the issues that you and your business currently face.

At the National, we have placed experienced Agribusiness Managers at strategic locations in Rural WA to provide a Banker who knows the local issues and who gives their client base the opportunity for on farm contact on a range of issues such as :

- **Seasonal and Term Lending**
- **Commodity Price Risk Management**
- **Harvest Loan Finance Options**
- **Equipment Finance**
- **Succession Planning and Protection Insurance**

We pride ourselves on our professional level of service and would welcome the opportunity to visit you on farm for a discussion on any aspect of you and your farms financial requirements. If you would like one of our local MidWest Agribusiness Managers to visit you, simply call them on their direct telephone numbers below.

PROTECT YOUR HEIFERS

ACT NOW TO PREVENT THE IMPACT OF VIBRIOSIS

**Give your future breeders the best start.
Start protection before conception.**

Vibriosis is a common sexually transmitted disease spread by bulls nationwide during joining. In newly infected herds, conception rates can drop as low as 40%.¹ Calf losses were 7% higher in mobs of heifers or cows with evidence of widespread infection with vibriosis during mating in the CashCow project.²

- **Protect your maiden heifers (over 18 months of age)**
One Shot = 2 Years Protection... this covers the main period of risk
- **Significantly increase economic returns³**
- **Obtain more calves at the right time**
- **Increase the number of calves weaned first round.**

Heifer vaccination has a positive impact

Trials in a large northern beef herd demonstrated that vaccinating heifers against vibriosis significantly improved (+11%) first round pregnancy rates.³

NEW INJECTOR

5mL Safeshot Injector
(recommended for safety and to reduce the incidence of lumps)

ZOETIS LEADING INNOVATION IN ANIMAL HEALTH FOR OVER 75 YEARS

Vibriosis

Up to 90% of northern herds may be infected with vibriosis,¹ while a recent survey of beef herds in southern NSW showed 9% were positive to vibriosis.³

Gross margins can be reduced by as much as 65% in the first year of infection in beef herds.¹

Vibriosis can result in permanent infertility in up to 11% of infected heifers.⁵

If a herd of 500 heifers experienced a calf loss of 7%, the resulting loss in future weaners sales at \$700 per weaner would be \$24,500.

Calf Loss 7% (35 calves) \$24,500

Annual Vaccination Program

Vibrovax	Heifers		Cows
	6 – 8 weeks pre-joining	2 – 4 weeks pre-joining	2 – 4 weeks pre-joining
	✓ ^	✓	✓

^ In heifers and cows over 18 months of age, only one dose of 5mL is necessary for the primary course. In younger animals it is recommended to give two doses of 5mL at the intervals shown above.

**For more information talk to your local
Zoetis representative or call 1800 963 847**
